(a)
(b)
Comparators
Pathology-only (no CT)
Channel statistics + LR
CT-bank controls
Untrained CT encoder
Gaussian-noise bank
Dimension-shuffled bank
Constant (mean) bank
Random retrieval
Circularity / forced use
InfoNCE, random positives
No gate floor / usage penalty
Component ablations
−Fusion (CDAM, gate)
−Adversarial
−InfoNCE
−Prototypes
Support size
